REMARKS

00-04 Underway Independently enroute from Johnston Island to Yokosuka Japan with YM-20 U.S Navy Dredge Gulfstream in tow in accordance with CINCPACFLT NOTE 03120 of 23 Nov 1964. Base course 290. Base Speed 9.5 kts. Modified material condition Yoke, Readiness condition II, Engineering condition III And damage control condition III set. High and Low flooding alarm lights on tow are flashing. 1400 feet of main tow wire out. 0157 c/s to 8.3. 0347 Notified commanding officer that tow had 30° list to starboard.

CWO J.L. Hollis, USN

04-08 Underway as before. Captain on the bridge Tow has an approximate 30° starboard list. 0412 attempted to come right to cuttle wind and sea on the stern of the YM-201 and thus prevent the seas from breaking over the bow. Ship would not come right using 10° right rudder, with the concurrance of the Captain decided to come left using 5° left rudder, ship and tow came around very slowly and in about 15 minutes steadied upon 150°. As the turn was being made to starboard list on the tow dredge worsened rapidly. And a Flash message was sent off to Conserpac telling him the situation. The Navigator also came up on the bridge at this time. 0443 Changed course to 160°. 0447 c/s to 50 RPM 6.7 kts. 0452 c/s to 65 RPM, 8.3 kts 0459 YM-20 keeled over to starboard and sunk, appeared that she was also down by the stern when she finally went down. List had increased rapidly in the last 15 minutes 0500, c/s to 95 RPM 12.3 kts 11.8 kts, motor room was called and told to give us all the speed they could and to put more engines in the loop, as the weight of YM-20 as the sub was pulling the ship backwards. 0501 tow wire came off the drum, motor room was called and told not to put the Engines in the loop c/s to 50 RPM 6.7 kts 0511 c/c to 290. 0745 Mustered the crew on stations. Absentee: none.

Ltjg C.P. McKenzie, USNR
